SUMMARY

Software engineer at Google building LLM-powered analytics and agentic tooling, BigQuery data platforms and RPC-based distributed services for Google Ads. Healthcare AI background spanning SMART on FHIR and HIPAA-compliant clinical apps, a Llama 3 RAG health assistant and genomics agents (DeepVariant). First-author biomedical deep learning research on PPG-based sleep staging with Vision Transformers (97.70% accuracy).

EXPERIENCE

Google, gTech Ads — Ads Solutions Engineer Jul 2025 — Present · Bengaluru

- Led the launch of a cross-media reach measurement platform and engineered its BigQuery-backed admin console with role-based access control, structured logging and input validation for strict data governance.
- Scaled creative-diagnostics and brand-lift / ROI dashboards by integrating Angular frontends with RPC-based distributed backend workflows.
- Led the migration of internal tools to Google Cloud for external ads partners, aligning cross-functional teams through PRDs and technical design docs.
- Built agentic workflows on Gemini ADK that cut time-to-insight by 80% and automated localized pitch-deck generation across APAC.
- Led "GenAI Blueprint — Demystifying LLMs, Multimodal and Agents", a tech masterclass upskilling peers on modern AI architectures.

Google Health AI · 20% projects Apr 2026 — Present

- Genomics agent for DeepVariant — prototyping an assistant that picks the right model for an input, generates DeepVariant commands, diagnoses failed runs and reasons at pileup level about whether a variant call is real, bridging VCF/BAM data and clinical action.
- Clinical terminology — a heuristic-priority mapper reaching 92.74% on SNOMED CT vaccine codes (self-built eval set); now building a standardization engine that maps clinical tokens to SNOMED CT and ICD-10, targeting 95%+ confidence.

ixigo — Software Developer Intern (PPO offer) Feb 2025 — Jun 2025 · Gurugram

- Built core modules of a scalable CMS that automates travel bookings and content management across ixigo's platform.
- Built the TARA help-bot with NLP-driven automation — 1.5x faster customer query resolution, wired to the CMS for live content.
- Engineered real-time backend APIs for instant content refresh, improving system responsiveness by 30%.

PostCare.AI — Full-Stack Developer Intern Jul 2024 — Feb 2025 · Maryland, US · Remote

- Built a real-time clinical dashboard and cross-platform app (React Native + Swift) unifying EHR data for 1,500+ patient records.
- Designed and shipped an in-house health assistant on Llama 3 + RAG with source citations, improving medical-query response accuracy by 60%.
- Implemented SMART on FHIR across EHR systems — 50% faster data retrieval, 65% fewer integration bugs — and passed 200+ HIPAA compliance checks.

IIT Delhi · Centre for Biomedical Engineering — R&D Intern Apr — Jul 2024

- First author of PPG-ViT-NET, a Vision Transformer for two- to five-stage sleep classification from raw PPG (wavelet scalograms), reaching 97.70% accuracy.

Earlier: Software Developer Intern, WhiteLabel Digital Services (Jun — Aug 2023) · Summer Research Intern, IITRAM (May — Jul 2023) · ML Research Intern, IITRAM (Dec 2022 — Feb 2023)

SKILLS

AI/ML: Transformers · LLMs · RAG · PyTorch · TensorFlow · Computer Vision
Healthcare: FHIR · HL7 · SNOMED CT · Medical Imaging · Biomedical Signals
Software & Systems: Python · Java · C++ · TypeScript · APIs · Distributed Systems
Infrastructure & Data: GCP · AWS · BigQuery · Docker · Kubernetes · SQL

EDUCATION

IITRAM, Ahmedabad — B.Tech, Electrical & Computer Science 2021 — 2025
